Special construction on request
MSM Modul + Column

GSU 55 cm Ref.: 075.U000.00
GSU 110 cm Ref.: 075.U001.00

MSM Miniature signal lamp

The geba miniature signal lamp is small, compact and lightweight. It is particularly characterized by its flat and aesthetic design. The MSM modul consists of 18 two-colored highpower diodes in red and green. Other combinations are available on request. The modul is completely sealed and can be wall mounted with the help of a metal bracket (included). The frame is made of powdered metal. It is possible to order the MSM module together with our geba GS-Universal column. During the corona-pandemic, this combination makes it easier to control the amount of people who enter your business.

Quick overview

- Flat and aesthetic design
- 18 two-colored highpower diodes (red/green)
- Minimal energy consumption
- Attachment with wall mounting bracket. No screws in the field of vision.
